DETAILED ACTION

1. It appears that claim 30 has the wrong dependency. For restriction purposes, claim 30 will be treated as being dependent on claim 29. Applicant is encouraged to amend the claim to correct the dependency.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
- I. Claims 28-33, drawn to a combination of a drive mechanism, an enclosure, and removable brackets, classified in class 251, subclass 291.
 - II. Claims 1-27 and 34-40, drawn to a remotely-actuated valve, classified in class 251, subclass 129.04.

The inventions are distinct, each from the other because of the following reasons:

3. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the combination does not require the flexible drive system to operate without stalling. The subcombination has separate utility such as an actuator and actuator housing for a doorbell.

Art Unit: 3754

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and because the search required for Group I is not required for Group II, and because these inventions have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

5. Should applicant elect Group II claims, this application contains claims directed to the following patentably distinct species of the claimed invention:

AX. The apparatus of Figs. 2-6 with the power/circuit module of Fig. 15.

AY. The apparatus of Figs. 2-6 with the power/circuit module of Fig. 16.

AZ. The apparatus of Figs. 2-6 with the power/circuit module of Fig. 17.

BX. The apparatus of Figs. 7-9 and 12-14 with the power/circuit module of Fig. 15.

BY. The apparatus of Figs. 7-9 and 12-14 with the power/circuit module of Fig. 16.

BZ. The apparatus of Figs. 7-9 and 12-14 with the power/circuit module of Fig. 17.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, there are no claims generic to all species.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Art Unit: 3754

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143). The election must include a species election if Group II claims are elected.

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
